*The Standard and Full Concert flute models are priced the same and come with the Nagahara Pinless Mechanism. All instruments feature soldered toneholes, french-arm keycups, and our special patented thumb key design for improved balance and comfort. The Nagahara Pinless mechanism features a "floating" steel held by a pivot screw. This ingenious design allows for a much higher level of accuracy in pad shimming, key balance adjustment, and custom spring tension, allowing a smoother action and feel on the mechanism. The Nagahara Split-E underslung design is elegantly hidden within the main line mechanism, avoiding obstruction to the right hand when playing high E. The Nagahara C# trill mechanism enhances the agility in many trills and tremolos.

The Full Concert (FC) Model features the Nagahara Pinless mechanism, an enlarged internal bore and toneholes size, an elongated headjoint with a greater taper, and the "Nagahara FC System" scale designed by Master Craftsman Kanichi Nagahara. This is a revolutionary design offered exclusively by Nagahara Flutes enabling a richer resonance, a broader range of dynamics, and ease of intonation control. Full Concert Headjoints are not interchangeable with other flute models or makes.

The Galway Model Just like the Maestro's instrument, the Galway Model includes the following features: a Galway model headjoint, No Gizmo Key (*added upon request*), the Nagahara Pinless Mechanism, & Wearless Mechanism Type II. The special key design in the Galway Model offers an extra touch of elegance, enhances the grip over the key-cups, and has a longer G# key spatula for added comfort.

Since both surfaces where the sound is produced are the same material, the sound is enhanced. The effect can be compared to having an entire lip plate of equal material.
