*The Standard and Full Concert flute models are priced the same and come with the Nagahara Pinless Mechanism. All instruments feature soldered toneholes, french-arm keycups, and our special patented thumb key design for improved balance and comfort. The Nagahara Pinless mechanism features a "floating" steel held by a pivot screw. This ingenious design allows for a much higher level of accuracy in pad shimming, key balance adjustment, and custom spring tension, allowing a smoother action and feel on the mechanism. The Nagahara Split-E underslung design is elegantly hidden within the main line mechanism, avoiding obstruction to the right hand when playing high E. The Nagahara C# trill mechanism enhances the agility in many trills and tremolos.

*Nagahara "Extended" Riser has a front protrusion or "lip" extending up into the plane of the lip plate, thus no solder line at the blowing edge. Since both surfaces where the sound is produced are the same material, the sound is enhanced. The effect can be compared to having an entire lip plate of equal material.

Embouchure cuts available: Diligente (D), Ardore (A), Spiniato (S), DA, DDA, DS, Galway (G), and G-Form (Galway G cut is available for the Standard and Full Concert models, called "G Form"). For more information please visit our website.
